

POL Thread Clean Out Tool

Application: For use with any female POL thread or valve inlet opening. Allows operator to safely remove debris and other foreign material from female .880-14 NGO LH threads (F. POL) without damaging threads. Simply thread clean out tool into female POL threads using handwheel until the tool reaches the final thread. Reverse and remove tool carefully. Reverse tool and use attached 7/8" diameter bottle brush to perform final clean out operation. Blow out any remaining debris by using a compressed air line.

Features:

- Constructed from hardened tool steel and plated for maximum product life
- Includes four clearance flutes to allow debris to be channeled away from threads
- Includes convenient 7/8" diameter wire bottle brush for final clean out

WARNING: These products contain a chemical known to the state of California to cause cancer and birth defects or reproductive harm

Warning: This product is strictly intended for use as a cleaning device and in no way can it determine the usability of the thread that it is being installed into. (Always refer to NFPA 58 and follow the appropriate guidelines prior to installing LP gas lines.)
