\*\*\* NEW PRODUCT \*\*\*

These high quality, inexpensive fittings provide a permanent means to test both high and low pressure lines in domestic tank installations, in addition to being easily adaptable to industry standard pressure test equipment.

## Features:

- Reliable method to test high and low pressure tap installations
- Provides an effective method to bleed vapor for pressure equalization and more accurate gauge readings
- Allows for an effective method to bleed vapor from the testing equipment prior to disconnect
- 1/4" MNPT outlet allows easy adaptation to industry standard pressure test devices
- Supplied with or without our high quality liquid filled pressure gauge

MEJ603HP

## Features:

- Provides an inexpensive way to permanently install a pressure tap upstream or downstream from the first stage regulator
- 1/8" FNPT allows for easy installation of pressure test monitoring devices
- #54 Orifice provides controlled line pressure for more accurate readings and protects test equipment from pressure spikes
- Available with or without 1/8" MNPT plug
