ME301

ME392

ME516

Type I Refilling Connectors		
Part No.	Description	Application
ME301	Female POL x 1/4" FNPT	If your current fill operation has a dedicated Male POL filler, then the addition of this adapter to your ME516 will allow the user to attach and remove the ME516 from their dedicated Male POL filler quickly and effortlessly.
ME302	1 5/16" Female Acme x Female POL	Designed to operate like the ME516 but shorter by design to fit into tight locations or in operations that may not fill enough Type I cylinder valve bottles to warrant the cost of a full size fill coupling.
ME516	1 5/16" Female Acme x 1/4" MNPT (6" Long)	A full size fill coupling that makes filling Type I cylinders quick and easy. Just a few turns allows the filler to attach and remove the coupling with minimal effort and loss of gas.
