Replaceable
Tip Seal

ME790SN
Patent Pending

Purpose: Provides a fast and reliable connection for filling motor fuel cylinders through the 1-1/4" M. Acme Service Valve Connector. This soft nose design is specifically intended to reduce product emissions while creating a more reliable seal with the service coupling.

Features:

- Replaceable tip seal for maximum service life
- Heavy duty brass body for maximum durability
- Forward positioned nose seal reduces emissions to .3cc at valve disconnect
- Provides universal connection to all current model service valve connectors ensuring maximum flow
- 1/4" MNPT inlet for easy hose connection
