

QCC QUICK FILL COUPLING

MEC[™]
EXCLUSIVE

ME796
(Patent Pending)

ME791CJ
(Not Included)

Purpose: Provides a fast and reliable connection for filling cylinders with QCC style 1-5/16" M. Acme service valves. This coupling provides a snap on / snap off design specifically intended to reduce labor and repetitive motion associated with threaded type fill couplings. Our glass filled nylon handle and stainless steel internal components provide a durable, light weight, and easy to operate fill coupling that will withstand even the harshest working conditions while reducing cylinder valve thread wear.

Caution: A quick closing shut off valve must be used with the ME796 QCC Quick Fill Coupling.

Features:

- Easy to use **snap on / snap off** action for quick fill operation
- Durable glass filled nylon handle
- All stainless steel internal components
- Large bore stainless steel stem for increased flow
- Designed for universal right or left hand operation
- Provides universal fill connection for all model QCC service valves
- 1/4" MNPT inlet for easy connection to hose end toggle valves
