

Stainless Steel Combination Valve

ME830SS

APPLICATION:

The ME830SS stainless steel combination valve combines a pressure gauge mounting port with a fixed tube liquid level gauge provision. Designed for bulk storage container and transport tank applications. Stainless Steel construction enables use in a wide range of applications while offering maximum corrosion protection for the life of the system.

SPECIFICATIONS:

- CF8M Grade stainless steel body
- All stainless internal components
- Shut-off valve increases pressure gauge life and accuracy by eliminating constant gauge pressure
- Integral #54 orifice provides gauge dampening protection
- Easy gauge replacement by closing valve and opening vent valve to relieve pressure
- Valve can be used for fixed maximum fill level and a 1/8" FNPT connection is provided for dip tube installation
- Weather boot protects stem and packing gland from weather and outside elements
- Factory installed stainless steel vent valve

Part No.	Container Connection	Service Connection	Liquid Level Vent	Dip Tube Connection
ME830SS	3/4" MNPT	1/4" FNPT for Gauge Mounting	Stainless Steel Vent Valve	1/8" FNPT
