### APPLICATION:

The MEGR-199 Series Industrial regulators are large capacity, pilot operated, low or high pressure units for use in applications with loads up to 75,000,000 BTU/H capacity. These regulators are best suited for industrial applications where high flow capacity and a downstream monitor control line can be applied. The MEGR-199 series provides exceptional downstream control while operating at very high capacities with minimal droop under varying flow and inlet pressures.
