

Low Emission Vent Valve & Fixed Liquid Level Gauges

MEJ400/72

MEJ401

MEJ410/72

Purpose: Provides minimal loss of product while allowing the operator to effectively bleed down connections and detect liquid levels while filling containers. Our number 72 orifice reduces traditional venting emissions by **55 Percent** during normal container filling operations.

Features:

- **55 Percent Less Emissions** to the atmosphere
- Number 72 orifice hole
- Removable stem for convenient cleaning and stem seal replacement
- Available with or without liquid level dip tube
- Durable all brass construction
- Meets all UL requirements for vent valves and liquid level gauges

Low Emission Vent Valve & Fixed Liquid Level Gauges	
Part No.	Description
MEJ400/72	Brass Liquid Level Vent Valve #72 Orifice
MEJ410/72-5.4	Fixed Liquid Level Gauge #72 Orifice with Dip Tube (5.4")
MEJ410/72-5.7	Fixed Liquid Level Gauge #72 Orifice with Dip Tube (5.7")
MEJ410/72-6.6	Fixed Liquid Level Gauge #72 Orifice with Dip Tube (6.6")
MEJ410/72-6.9	Fixed Liquid Level Gauge #72 Orifice with Dip Tube (6.9")
MEJ410/72-120	Fixed Liquid Level Gauge #72 Orifice with Dip Tube (12")
Replacement Part	
Part No.	Description
MEJ401	Replacement Vent Valve Screw & Seal Assy
