

Multi-Service DOT 200lb. Container Vapor Valves

MES-PVE2030BC
Multi-Service Valve

APPLICATION:

Intended for use in vapor withdrawal service for DOT containers up to 200 lb. LPG capacity as fuel line shutoff valves in combination with a fill and vapor relief valve. Ideal for on-site filling without interruption of service by combining all functions into a single 3/4" NPT tank opening.

FEATURES:

- One piece forged brass body construction
- Integral Fill Valve
- Easy to repair / replace bonnet assembly
- Integral 375 PSI relief valve
- Heavy duty replaceable zinc hand wheel
- Liquid splash tube to prevent liquid in vapor opening
- Optional MEJ401SC self-cleaning LE filled liquid vent screw
- F. POL vapor outlet with shutoff
