

Semi Internal Relief Valves

Description

Designed for use in large stationary LPG containers as a primary pressure relief valve. These pressure relief valves have been specifically designed to provide optimum performance when installed in either a 2" half or a 2" full coupling making them perfect for most large stationary tank installations.

Note: Available with all stainless steel construction for NH3 service applications.

Note: Suitable for use in mobile applications where adequate DOT approved roll over protection to the relief valve body is present.

Features

- Durable forged brass body with 3" NPT outlet pipeaway thread
- All steel & stainless steel stem, spring, and valve gasket holder for maximum corrosion resistance
- Available with Nitrile, Viton®, or Kalrez® valve seals
- Large seating surface for superior seal performance & reliability
- Available with 125, 250, 265 PSI  LISTED set pressures
- Custom set pressures available
